

Corn

ELAMIANA

Medium early corn (FAO 250)

- **hybrid with medium short cycle : fast growth and plasticity**
- **High silage yield potential, adapted to fairly dry conditions**
- **Very high protein content, excellent digestibility, long ears**

IDENTITY

- Genetic	Double cross Hybrid
- Type	Flint to semi-dent
- Market	Silage
- Earliness	Medium early (B group)
- Registration	2021, European Union

AGRONOMIC PROFILE

- Early vigor	Very good
- Morphology	Robust vegetative development
- Plant height	High
- Ear insertion	Higher
- Leaf attitude	Semi-erected
- Flowering earliness	Mid early
- Lodging resistance	Good

TECHNOLOGIC PROFILE

- Feeding value, digestibility	Excellent digestibility
- Milk / Meat F. U.	Very good energetic values
- PDIN, PDIA	High productivity of digestible proteins

CROPPING ADVICE

Plant between 90.000 and 100.000 seeds / Ha
