

# Corn

# LS Marelia

**Ultra early corn**

- Hybrid with ultra short cycle and very fast dry down
- Adaptability to high plant densities with good mineral nutrition
- High share of ears - excellent digestibility

## IDENTITY

- Genetic	<b>Three way cross hybrid</b>
- Type	<b>Flint - soft flint</b>
- Market	<b>Grain and silage</b>
- Earliness	<b>Ultra early</b>
- Registration	<b>2020, European Union</b>

## AGRONOMIC PROFILE

- Early vigor	<b>Very good</b>
- Morphology	<b>Fast vegetative and generative</b>
- Plant height	<b>Short</b>
- Ear insertion	<b>Low</b>
- Leaf	<b>Semi erected</b>
- Dry down	<b>Very fast</b>
- Lodging resistance	<b>Good</b>

## TECHNOLOGIC PROFILE

- Feeding value, digestibility	<b>Excellent digestibility</b>
- Milk / Meat F. U.	<b>High energy</b>
- PDIN, PDIA	<b>High productivity of starch</b>

## CROPPING ADVICE

**Plant between 120.000 and 130.000 seeds / Ha**
