

Corn

SERBILIA

Late Corn

- ✓ **Very productive and regular hybrid**
- ✓ **Excellent grain yield**
- ✓ **High and well developed plant, good staygreen**
- ✓ **Very good tolerance to lodging and diseases**

IDENTITY

Genetic	Single hybrid
Type	Dent
Market	grain
Earlyness	Late – FAO 450
Registration	2014 - European Union

AGRONOMIC PROFILE

Early vigor	
Morphology	
Plant height	
Ear insertion	
Flowering earliness	
Disease profile	
Lodging resistance	
Températures	Silage (32 % Dry matter) 1.670 °C Grain (35 % Humidity) 1.900 °C

TECHNOLOGIC PROFILE

Feeding value	
Digestibility
