

# Corn

# LS Tirnavia

Early to semi-early corn

- ✓ **Very good yield potential**
- ✓ **Rustic, very good health profile**
- ✓ **Very good digestibility and feeding value**

## IDENTITY

Genetic	<b>3-way cross</b>
Type	<b>Flint to semi flint</b>
Market	<b>grain and silage</b>
Earlyness	<b>Early to semi early (end of B group)</b>
Registration	<b>2011 - European Union</b>

## AGRONOMIC PROFILE

Early vigor	
Morphology	
Ear insertion	
Lodging resistance	
Yield	

Temperatures : Silage (30 % Dry matter)	1.480 °C
Grain (35 % Humidity)	1.700 °C

## TECHNOLOGIC PROFILE

Feeding value	
Digestibility	

## CROPPING ADVICE

Plant between 95 000 and 105 000 seeds / Ha
